

ENERGY WISE

for your Home

With as much as half of the energy used in your home going to heating and cooling, choosing ENERGY STAR certified heating and cooling equipment can have a big impact on your comfort, while helping you save money.

YOUR GUIDE TO HEATING AND COOLING

Air Source Heat Pump (ASHP)

- It's the best of both worlds. ASHPs provide home cooling and supplemental heating with 72 percent less electricity than conventional air conditioners and furnaces.
- You can switch between cooling and heating directly from the thermostat, putting you in complete control.

Central Air Conditioner

- If your air conditioner is more than 12 years old, replacing it with an ENERGY STAR[®]-certified model could cut your cooling cost by 30 percent.

No rebate is offered for Central Air Conditioners.

CAC and ASHP Tune Up

- The best way to ensure efficient operation of your cooling system is by having it tuned-up every two years. Unit must be at least three years old to qualify for rebate.
- A tune-up by a service expert can improve your unit's efficiency by as much as 20 percent, extend its life and help protect our environment.

Ductless Air Source Heat Pump (ASHP)

- Use 60 percent less energy than standard home electric resistance-based heating systems, because they transfer instead of generate heat.
- Use sophisticated compressors and fans that can adjust speeds to save energy. You can cut cooling costs by 30 percent compared to conventional room air conditioners.

Electronically Commutated Motor (ECM) for your furnace

- ECMS help save energy and money by running at the best speed, opposed to traditional motors that always run at top speed.
- Furnaces equipped with an ECM have lower annual operating costs and can save you \$40 to \$300 per year depending on how you use the furnace fan.

Ground Source Heat Pump (GSHP)

- The most efficient residential heating and cooling system available today.
 - Provide energy savings of 20-50 percent, which results in recouping your investment in only a few years.
 - Heating efficiencies 50-70 percent higher than other heating systems and cooling efficiencies 20-40 percent higher than available air conditioners.
- Federal tax credit for Geothermal has been reinstated for 2018-2022.

HEATING AND COOLING

Rebate Application

Member Information:

Name _____ Account # _____

Address _____

City _____ State _____ ZIP _____ Phone _____

Member Type Homeowner Renter Landlord Builder Other

By signing this application, I certify the appliances for which I am claiming a rebate are qualifying ENERGY STAR® rated products and are installed at the address listed above which represents a valid cooperative account.

Signature _____ Today's date _____

Equipment Information

Please submit a copy of paid invoice confirming model number and SEER where applicable.

Ductless ASHP Brand _____ Model Number _____

ECM Motor Brand _____ Model Number _____

New Furnace with ECM Model Number _____ AHRI Number _____

Air Source Heat Pump Manufacturer _____ Model Number _____

AHRI Number _____ Unit Tons _____ SEER _____

Dual Fuel backup heat source, if applicable _____

Ground Source Heat Pump (GSHP) Manufacturer _____ Model Number _____

Unit Tons _____ Dual Fuel backup heat source, if applicable _____ Household Annual Energy Use (kWh/yr) _____

Contractor Information – Tune Ups, ECMs and ASHPs

Central Air or Air Source Heat Pump Tune Up Equipment Brand _____ Model Number _____

Serial Number _____ Approx. age of unit _____ yrs. SEER rating _____

Name _____ City _____ State _____

Contractor signature _____ Contractor company _____

For Central Air or ASHP Tune Ups:

I certify that I have completed the following on this unit.

- | | |
|--|--|
| <input type="checkbox"/> clean condenser coil & check belt, if needed | <input type="checkbox"/> test all controls & blow out drain lines |
| <input type="checkbox"/> check coolant level & lube motor, if needed | <input type="checkbox"/> check indoor furnace filter & educate homeowner on system operation |
| <input type="checkbox"/> check coolant pressure visually & inspect entire system | |

Retailer Information – Ductless ASHPs

Retailer/Store Name _____ Location _____

Rebates are available for Central Air/ASHP tune ups, and the purchase of Air Source Heat Pumps, Ductless ASHPs, ECM motors and GSHPs. Rebate submittal must follow the guidelines as outlined by the cooperative. The cooperative is not responsible for inaccurate information supplied by appliance dealers. Rebates will be issued only for products on the current list of ENERGY STAR® rated products as of the purchase date. ENERGY STAR® occasionally removes products from qualifying lists, and the cooperative will not rebate products that have been delisted as of the purchase date or are mislabeled as ENERGY STAR®. To verify ENERGY STAR® certification for ductless air source heat pumps, visit <http://www.ceedirectory.org/ceedirectory>. Rebate program is subject to change or cancellation without notice. Call the cooperative to verify rebate program status.

Important:

- Check with cooperative for qualifying rebate amounts.
- Product(s) must be installed within the cooperative's service territory.
- Include a copy of the original dated sales receipt(s).
- Submit completed rebate form and a copy of the original sales receipt to:

Brown County REA

PO Box 529

Sleepy Eye, MN 56085

Call 800-658-2368 or 507-794-3331 with questions.
