

Keep a Safe Distance

Whether you are playing outdoors with your children or working on landscaping projects, keep a safe distance from power lines and other equipment your co-op uses to get electricity to your home.

Always remember to:

- Stay away from power lines, meters, transformers, and electrical boxes.
- Do not climb trees near power lines.
- Never fly kites, remote control airplanes or balloons near power lines.
- If you get something stuck in a power line, call your Touchstone Energy co-op to get it.
- Keep a safe distance from overhead power lines when working with ladders or installing objects such as antennas.
- Never touch or go near a downed power line.
- Do not touch anything that may be touching a downed wire, such as a car.
- Keep children and pets away.
